Karan Grewal

karanraj.grewal@mail.utoronto.ca
https://karangrewal.github.io/
Toronto, Canada

Education

2014–2018 **University of Toronto**
GPA: 3.93/4.00 B.Sc., Computer Science, Mathematics

2017 **National University of Singapore**
Academic Exchange (4 months)

Research Positions

2017–present **Montréal Institute for Learning Algorithms**, Université de Montréal
Supervisors: Yoshua Bengio & Devon Hjelm

- Studied the integral role of disperse intermediate representations in Generative Adversarial Nets (GANs) and developed a new training objective using meta-adversarial training. Our method encourages the discriminator to follow a bimodal Gaussian distribution and alleviates vanishing gradients and mode collapse. Currently using conditional normalization to perform zero-shot generalization for image classification and generation.

2016–present **Dynamic Graphics Project**, University of Toronto
Supervisor: Khai Truong

- Applied natural language understanding techniques and textual data analysis to discern rude conversational behaviour in social contexts; identified major problems which make this task difficult. Studied traditional sentiment analysis methods in the context of conversational speech.

Papers

2017 **Variance Regularizing Adversarial Learning**
Karan Grewal, R Devon Hjelm, Yoshua Bengio.
Submitted to *ICLR 2018*, in *ICML 2017 workshop on Implicit Generative Models*.

2017 **On the Challenges of Detecting Rude Conversational Behaviour**
Karan Grewal, Khai N. Truong.
ArXiv 1712.09929.

Industry Experience

2016 **Rubikloud Technologies**
Internship with Data Engineering Team

- Created an internal pipeline to detect patterns and anomalies in client data. Wrote queries to reverse-engineer unspecified retail promotions.

2015 **BMO Financial Group**
Internship in Technology PMO
- Managed long-term projects to improve internal & client-facing platforms.

Notable Awards

2017 **Samsung Research Scholarship**
Supports Deep Learning research at Montréal Institute for Learning Algorithms.

2015, 2016, 2017 **Dean's List**
Honorable mention for students with GPA greater than 3.50.

Talks

2017 Université de Montréal, "Variance Regularizing Adversarial Learning".

2017 Canadian Undergraduate Computer Science Conference, "Rudeness Detection in Two-Person Conversations".

Teaching

Winter 2018 **CSC263 Data Structures & Analysis**, University of Toronto
Teaching Assistant

Fall 2016 **CSC343 Introduction to Databases**, University of Toronto
Teaching Assistant

Coding

- Python, Java, C, SQL, Theano, Lasagne.

Relevant Coursework

- APM462: Nonlinear Optimization
- CSC384: Artificial Intelligence
- CSC411: Machine Learning
- CSC438: Computability & Logic
- MAT237: Multivariable Calculus
- MAT327: Topology
- MAT357: Real Analysis
- STA4273: Learning Discrete Latent Structure
